## DETAILED ACTION

1. Claims 15-26 are pending.

### *Response to Arguments*

2. Applicant's arguments, see pages 10-13 of the remarks filed 1/22/2008, with respect to the art rejections of claims 15-26 have been fully considered and are persuasive. The rejections of claims 15-26 under 35 USC 103 have been withdrawn.

### *Claim Rejections - 35 USC § 101*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. **Claims 21-26 are rejected under 35 U.S.C. 101** because the claims are directed towards nonstatutory subject matter. The cited claims are an example of functional descriptive material consisting of data structures and programs that impart functionality when employed as executed by a computer component. The functionality of functional descriptive material is realized only when the functional descriptive material is claimed as being embodied on a computer readable medium and is claimed as executed by a computer component. Examiner is unable to ascertain what hardware elements provides tangible computer components that work in conjunction with the functional descriptive material to impart functionality. Thus, the claims are not statutory

Art Unit: 2134

because they fail the practical application requirement of § 101 by failing to provide a useful, concrete, and tangible result (see MPEP 2106).

***Allowable Subject Matter***

4. Claims 15-20 are allowed.
5. Claims 21-26 would be allowable if amended to overcome the rejections under 35 USC 101.
